Wales is a self-governing constituent country of the UK and the Welsh Government is the devolved Government for Wales.

Devolved since 1999, the Welsh Government's decision-making powers within a small and joined-up country mean we can cut red-tape and act fast.

They also mean we are responsible for our own economic development, working with business to create a prosperous; green and equal economy.

Wales has a strong industrial heritage that has shaped our confident, creative and ambitious economy of today. We have strength in depth in advanced manufacturing, creative industries, energy and environment, financial and professional services, food and drink, life sciences, and technology.

Our commitment to sell Wales to the world has never been more focussed and this mission provides an ideal platform for us to build on established links and discuss future export opportunities.

Wales means business.

Eakin Surgical (formerly Single Use Surgical), was founded twenty years ago in response to the challenges faced when cleaning surgical instruments.

Hospitals identified that difficulty in cleaning surgical fine lumen suction created a high risk of patient-to-patient cross-infection.

Extensive consultation with hospitals and clinicians has led Eakin Surgical to develop a wide range of single use suction tubes and other surgical equipment. The instrument design aims to match the high quality, ease of use and functionality of the reusable equivalent, and is guaranteed clean and sterile whilst delivering cost and efficiency savings.

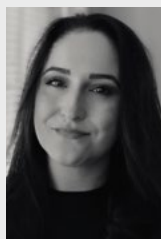

Eakin Surgical is part of Eakin Healthcare Group est.1974, in order to provide innovative products that focus on offering a better patient experience. The Group still works with this goal at its heart, and now with extensive experience of manufacturing and supplying medical products to the healthcare industry. Group vision is always to put safety first, while providing sustainable outcome-led solutions for operating rooms worldwide that address modern healthcare challenges.

Product/Service

Eakin Surgical's range of products include suction, smoke evacuation, pulse lavage, metal instruments, forceps, retractors, rongeurs, suction irrigation, cannulas, and needles.

Objectives

- Eakin Surgical is looking to:
- Meet with current distributors and search for new international distributors
 - Increase brand awareness within the global market
 - Grow its worldwide presence
 - Identify potential new products

Genmed Enterprises is a privately owned medical device manufacturer with a key focus in minimal invasive access surgery. Genmeds' management team has more than 30 years combined experience in the design, development, marketing, selling and manufacturing of medical devices.

The company's key focus is to develop close working relationships with healthcare professionals in order to understand the exact needs and requirements for each individual speciality where the Genmed products are being used. This understanding allows for the company to be at the forefront of new developments and ensure the product range is continually evolving to meet the end users demands. The company constantly strives to assist healthcare professionals with improved safety and efficiency in surgery whilst also providing improved patient outcomes.

With manufacturing units, offices and warehouse facilities strategically situated in the UK and Asia the supply chain is extremely efficient and flexible. This robust supply chain allows the company to manage its partners requirements effectively and react to market demands in a timely manner. Genmed is an established provider into the UK market and works closely with its partners in other countries outside the UK to assist with the development of their International business.

Product/Service

Genmed Enterprises manufactures a comprehensive range of disposable trocars, monopolar instruments, clip appliers, retrieval bags and veress needles, offering a truly valuable proposition to its customers.

Objectives

Genmed Enterprises is looking to identify new partners for its products.

As a proud member of the Arjo family, **Huntleigh** believe that great healthcare is always a collective effort. The greatest contribution Huntleigh can provide to patients, and the professionals who care for them, is confidence.

This is what Huntleigh have been striving for since 1979, with innovative solutions in vascular care, Fetal and patient monitoring. Solutions that can assist clinicians in improving outcomes and enhancing patient wellbeing. Whether it's the safe delivery of a new life, improving the day-to-day quality of life or monitoring life's vital signs, Huntleigh aims for clinical excellence and improved performance, for life.

Product/Service

Huntleigh proudly boasts world leading brands such as Dopplex, Hydroven, Sonicaid and Smartsigns, covering healthcare requirements in Vascular Assessment & Treatment, and Obstetrics & Patient Monitoring.

Objectives

Continue to develop a global reputation as a leading UK manufacturer and supplier of high quality medical devices.

Reacta's mission is to improve the quality of life for severe food allergy sufferers globally through accurate diagnosis and therapeutic monitoring.

With world leading scientific and clinical experts in food allergy, the business has developed an innovative and easy to use food allergy diagnostic kit which is currently in use by clinicians as part of numerous clinical trials around the world.

Product/Service

Reacta's technology is addressing an unmet need for standardised, stable, accurate and fully masked high-quality Oral Food Challenges (OFC's).

OFC's are the gold standard for food allergy diagnosis. Blood tests and skin prick tests for food allergy yield many false positive results leading to many "worried well" who may be placed on inappropriate and expensive therapies. Furthermore, false negative results may leave allergic patients at risk of accidental exposure.

OFC's have been shown to improve the quality of life of patients as they can give individuals an indication as to whether they are likely to react to foods carrying 'may contain' allergen labels.

Reacta's products are manufactured in a world-class Pharma GMP accredited facility.

Objectives

Reacta aims to be the first regulatory-approved OFC available on the market.

Butterfly Data is a team of experienced technology consultants specialising in data science and data management.

The company helps organisations achieve data-driven results, through digital transformation using cloud services. Butterfly offers a comprehensive technology service specialising in data science and data management disciplines.

Product

Butterfly Data in collaboration with a local university hospital has developed a wearable technology device. Sensors stream data to an IoT hub to track real time patient data, alerting for particular issues. Long term health outcomes for cohorts of patients will also be analysed.

Service

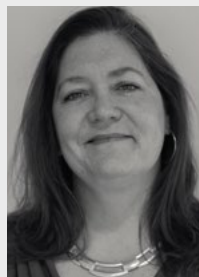

Informed, transparent, accountable, data-driven decisions have the potential to enhance many aspects of our lives:

- Revealing hidden trends and patterns.
- Creating streamlined, efficient processes.
- Producing accurate models and predictions.
- Improving customer and employee engagement.
- Strengthening healthcare data quality.
- Improving decision transparency and accountability.
- Delivering positive and enduring social outcomes.
- Solving complex, global challenges.

Objectives

Butterfly offers a comprehensive technology service specialising in data science and data management disciplines. The team has a breadth and depth of hands-on experience at all stages of the information management lifecycle:

- Provide a tailored service and deliver integrated solutions
- Blend domain knowledge, business analysis, and data science
- Propose realistic solutions, manage expectations, and communicate clearly

NPTC Group of Colleges is an award-winning UK Further and Higher Education College with over 25,000 annual enrolments. NPTC is one of the largest groups of colleges providing Academic and Technical Vocational Education and Training (TVET) over nine specialist campuses across one-third of the landmass of Wales.

NPTC work with vocational colleges, universities, and institutions worldwide to develop and support international skills and standards, delivering bespoke specialist vocational and professional training programmes across a wide range of areas and disciplines. NPTC Group of Colleges has several international offices across South and East Asia.

Additionally, NPTC Group runs and owns eight subsidiary companies across the UK, including the UK's no.1 English language school, LSI Portsmouth. It annually supports thousands of overseas students and professionals from almost 50 different EU and non-EU countries.

Product/Service

NPTC Group provides educational services, specialist training and qualifications in a wide range of programmes and courses for individuals, companies, and governments. NPTC identify specific needs and design in collaboration, highly personalised bespoke programmes meeting the needs of its clients.

Objectives

NPTC Group's key objective is to increase NPTC Group of Colleges brand awareness by showcasing its leading products, services and industry links within the health and education sector.
