Wales Millennium Centre, Cardiff Bay

Wales is a self-governing constituent country of the UK and the Welsh Government is the devolved Government for Wales.

Devolved since 1999, the Welsh Government's decision-making powers within a small and joined-up country mean we can cut red-tape and act fast.

They also mean we are responsible for our own economic development, working with business to create a prosperous, green and equal economy.

Wales has a strong industrial heritage that has shaped our confident, creative and ambitious economy of today. We have strength in depth in advanced manufacturing, creative industries, energy and environment, financial and professional services, food and drink, life sciences, and technology.

Our commitment to sell Wales to the world has never been more focussed and this mission provides an ideal platform for us to build on established links and discuss future export opportunities.

Wales means business.

Anything for Hire is a rental service broker based in the UK that specialises in luxury transportation. The company has become an industry leader by using a combination of state-of-the-art technology and various online marketing techniques. With years of industry experience, the team has developed the necessary skills and expertise to rapidly advance the project to the next level.

Product/Service

Anything for Hire connects customers with operators providing transport rental services wedding cars, limousines, party buses, chauffeur-driven cars, coaches, minibuses, helicopters, corporate event transportation and more.

Objectives

- Replicate the UK business & success in the U.S. market and position limorental.com as a dominant player in the industry.
- Provide luxury vehicle rental operators in the U.S. with a high-performance, technology-driven brokerage platform.
- Acquire comprehensive knowledge of U.S. business operations, including identifying any regulatory or compliance obstacles.
- Develop a strong industry presence by connecting with operators and centralising in the luxury rental industry.

Finalrentals helps consumers find the best prices for car rentals online while empowering local car rental companies to boost their online presence and gain a wider reach to potential customers without the need to understand the technologies involved.

2022 saw expansion into 14 new countries and 172 new locations and on average each location makes £14 thousand annually through Finalrentals innovative 3-tier technology solution.

Considering the fact of how big the car rental market is, the capabilities of Finalrentals as a technology export company has great potential. Based on the customer feedback so far, it is evident that their technology is helping local car rental companies to acquire more customers and become better at technology. The penetration of Finalrentals product proves that the technology meets their customer's needs and requirements.

Product/Service

Car Rental Technology based on Web, Mobile and API

Objectives

Finalrentals is looking forward to expanding to the United States and is looking forward to meeting local car rental companies for a demo of their platform and marketplace.

Raplas Technologies manufactures large Industrial 3D Printers and suppliers of resins for 3D printing systems. Founded in 2018, Raplas Technologies builds machines at its UK factory in Penarth, Wales and is recognised globally as a market leader in the Industrial space.

Since moving to Wales in 2021, Raplas has transferred its R&D, manufacturing and assembly from other locations and increased its headcount with increasing numbers of components sourced locally. Raplas exports over 90% of its goods around the world – mainly to the U.S.A. Europe Japan and Korea and supplies unique industrial 3D printing resins.

Raplas is committed to working at the leading edge of the industry with open machines able to work with any compatible resins. Driven by their Raplas Integra+ operating system machines lead the market for speed, consistency and accuracy, suitable for many end uses.

Product/Service

Manufactures high precision Industrial 3D Printers and resins for 3D printing systems.

Objectives

To increase exposure to the West Coast of USA with a view to connect with industrial customers, potential distributors, educational institutions, and 3D printing resin formulators.
