Wales is a self-governing constituent country of the UK and the Welsh Government is the devolved Government for Wales.

Devolved since 1999, the Welsh Government's decision-making powers within a small and joined-up country mean we can cut red-tape and act fast.

They also mean we are responsible for our own economic development, working with business to create a prosperous, green and equal economy.

Wales has a strong industrial heritage that has shaped our confident, creative and ambitious economy of today. We have strength in depth in advanced manufacturing, creative industries, energy and environment, financial and professional services, food and drink, life sciences, and technology.

Our commitment to sell Wales to the world has never been more focussed and this mission provides an ideal platform for us to build on established links and discuss future export opportunities.

Wales means business.

Based in Cardiff, **7SteelUK** (formerly CELSA UK) is a high volume Electric Arc Furnace (EAF) steel manufacturer, producing 1m tonnes of low CO<sub>2</sub> steel for the construction and engineering sector.

By recycling around 1.2m tonnes of locally sourced scrap through the EAF delivers, 98% recycled content with an Environmental Product Declaration (EPD) of 374kgCO<sub>2</sub>/T, making 7Steel one of the most sustainable steel producers in Europe.

Alongside the EAF production, 7SteelUK has two hot rolling facilities that produce reinforcement and section products. 7SteelUK also has multiple up-stream scrap processing capabilities and down-stream steel fabrication facilities that combine to allow closed-loop circular steel solutions to supply chain resilience.

---

### Product/Service

- Low-CO<sub>2</sub> /high-recycled content steel reinforcement for concrete structures
- Efficient, agile and scalable cut & bend, fabrication and mesh capability to supply reinforcement solutions
- 7SteelUK Circular Steel transforms decommissioning / end-of-life energy assets into new steel product for the Offshore Wind supply chain

---

### Objectives

The 7SteelUK strategy is to support and align with a resilient local supply chainS for Offshore Wind in three main areas:

- Port Infrastructure Developments
- Fix Based Offshore Wind Developments
- Floating Offshore Wind Developments

**BGB Group** is an independent SME access specialist and multi-discipline service provider headquartered in North Wales, UK.

Founded in 2007, the business has grown organically through a self-delivery model, directly employing and developing its workforce, supported by structured apprenticeship programmes that promote long-term capability and skills retention. Operating with a think global, act local philosophy, BGB has established an international presence across the UK, Europe, the United States, APAC, and Poland, enabling responsive local delivery supported by global experience. BGB is widely recognised as a trusted supply-chain partner to the offshore renewable energy sector, having supported major offshore wind projects worldwide, including work on every U.S. offshore wind farm to date. Safety, collaboration, and operational excellence underpin long-term client partnerships and value-driven delivery.

### Product/Service

BGB's services are built around access as the enabler, allowing the company to self-deliver specialist works safely and efficiently under a single contract. Services include scaffolding and industrial rope access, alongside inspection, maintenance support, insulation, coatings, and other access-dependent activities. By integrating access, planning, installation, and execution, BGB reduces interfaces, improves safety and programme control, and maintains clear accountability throughout the project lifecycle.

### Objectives

BGB aims to provide a single-source, access-led solution for complex onshore and offshore environments. By continually evolving its service offering in response to client needs, BGB simplifies delivery, reduces contractor interfaces, and ensures clients only need one trusted partner from mobilisation through to completion.

**Excelerate Technology** is a global connectivity and data technology developer and systems integrator.

Formed in 2001, Excelerate integrates cutting-edge IoT and communications technology in the toughest environments, driving resilience, reliability and operational excellence. Its mission is to embed the right, adaptable technology at the edge of every application. Excelerate works across a wide range of sectors where reliable technology isn't optional, it's essential. Excelerate's experience spans a range of industries and operations each with requirements for keeping people safe, systems running, and society moving.

### Product/Service

Excelerate's products and services range from a WiFi hotspot to fully integrated command and control vehicles, encompassing bonded connectivity networks, drones, situational awareness cameras, and remote operations online platforms. Its services include 24/7 support for its satellite and cellular network provisions. Excelerate's proprietary products include a high resilience network bonding router for unbreakable connectivity on the move; a cellular optimisation antenna providing mobile connection in otherwise low- or no-signal areas; and high bandwidth video streaming solutions.

### Objectives

Excelerate's objectives for this mission are to improve our understanding of the global wind industry, including connectivity standards, requirements, and supply chain, and to raise awareness of current state of the art within connectivity and data sharing that could be more widely applied to the wind industry.

**Halton Marine** products are specifically designed for demanding conditions. In addition to multiple wind turbine, windfarm and substation projects, the company has delivered products for over 200 oil & gas projects, over 150 major cruise ships and over 100 naval vessels.

**Halton**

Type approvals from the major classification societies and worldwide references are a solid proof about product quality. As a reliable manufacturer Halton Marine has also certifications including ISO 9001, ISO 14001, OHSAS 18001 and ATEX. Halton Marine is also qualified by FPAL and the Achilles Joint Qualification System, for suppliers to the Oil & Gas industry.

---

### Product/Service

---

Designing and manufacturing extensive range of HVAC equipment to include:

- Fire Dampers
- Shut off/isolation Dampers
- Blast Dampers
- Pressure Relief & Non Return Dampers
- Intelligent volume control/constant volume Dampers
- Moisture and Salt Eliminators
- Bespoke customer specific Dampers

---

### Objectives

---

To meet with key stakeholders throughout the supply chain from owner operators through to HVAC contractors to discuss how Halton can assist with existing projects and develop the products of the future.

## **Growth.**

The vibrant capital city of Wales – Cardiff is one of the fastest growing cities in the UK. It is also just two hours on the train from London.

## Marine Power Systems is redefining deep-water offshore wind energy generation.

By challenging conventional thinking and rigorously testing its technology, Marine Power Systems addresses the industry's biggest challenges — supply chain limitations, deployment complexities, scalability, cost and risk. The company is making deep-water offshore wind power a practical reality.

The company's PelaFlex solution offers a clean, simple and scalable approach. It streamlines project delivery by transitioning seamlessly into deeper waters using existing offshore wind infrastructure. Using current key supply chain capacity is central to the robust and certain delivery model it offers, reducing the risk profile of any deep-water project. The company are taking offshore wind further.

---

### Product/Service

---

MPS provides a range of engineering services to highlight PelaFlex's technical, commercial and local economic benefits for wind farm developments, before and after seabed lease.

MPS offers a complete platform solution at the quayside, supported by reputable delivery partners. Project specific commercial models can be tailored to customer needs.

---

### Objectives

---

To share with key industry stakeholders how MPS is setting the

industry standard for the deployment of deep-water offshore wind. To explore commercial and collaboration opportunities with partners and clients to leverage their more efficient, less complex solution to making deep-water wind economically viable.

**Pinpoint Manufacturing** is a market-leading manufacturer of industrial lifting bags, supplying both the offshore and onshore renewable energy sectors.

Founded in 2006, based in South Wales, UK, Pinpoint combines cutting-edge design with traditional British craftsmanship. Alongside their standard range of lifting bags, the company specialises in bespoke solutions, tailoring products to meet each customer's unique requirements — no matter the scale or complexity of the project.

While Pinpoint aims to expand its reach in the global market — supplying some of the world's largest renewable energy and offshore organisations — its core values remain unchanged: a dedicated family business built on trust, quality, and products that perform reliably in the harshest conditions.

---

### Product/Service

---

Pinpoint lifting bags are designed and manufactured at their UK facility, enabling complete control over specification, quality, and performance. Every product undergoes rigorous safety testing and is built to meet international standards.

Each load-rated bag is supplied with a Certificate of Conformity, a clearly stated Working Load Limit (WLL), and a comprehensive usage and inspection guide — ensuring your team remains safe, compliant, and confident in operation.

Pinpoint offers a wide range of customisation options to suit specific customer requirements. Bags are available in a range of material colours and can be enhanced with additional features. At Pinpoint Manufacturing, they don't just produce lifting bags — they engineer peace of mind.

---

### Objectives

---

Pinpoint's objectives are:

- To meet key stakeholders to help raise awareness of their unique lifting bag products.
- To gain a better understanding of how they can support global customers to meet their lifting requirements.

**Robertson Geo** is a leading UK based manufacturer of borehole logging equipment for sale or rental and a provider of ground investigation services.

With over 40 years' experience in the field of wireline logging, Robertson Geo has been continually innovative in the development of its comprehensive range of geophysical logging probes and associated equipment.

### Product/Service

Robertson Geo offers a range of borehole logging equipment which is sold to more than 160 countries, supported by offices in UK, USA and Asia with more than 25 approved agents worldwide. As an original equipment manufacturer, the company can accommodate all your needs for borehole logging.

Unique in the industry, Robertson Geo has an in-house borehole logging team, Robertson Geo Services (RGS), who provides ground investigation services and manage borehole logging equipment rentals worldwide. The company's geophysical logging equipment development benefits from RGS feedback, whose expertise are also used for commissioning and training to support its sales customers.

In OWF geotechnical investigations, the PS Logger® probe is routinely used to determine Poisson's ratio and shear strength. Robertson Geo also offers a range of other services to benefit ground investigations including Televewers, Calipers and NMR.

### Objectives

Strengthen the company's existing relationships with industry leaders, while showcasing expertise and talents to newcomers to the OWF market.

## **Decision making.**

Wales is a connected country with a devolved Government for fast decision making from Ministers. The Senedd is home to our Welsh Parliament.

**Cambrian Furniture Company** is the market-facing umbrella brand of SDB Interiors, a Wales-based, designed manufacturing business producing precision-made fitted and freestanding furniture for residential, commercial, healthcare and leisure environments.

The business is led by Anthony Beckett, Managing Director, whose BIM-led technical approach uses three-dimensional modelling and realistic visualisation to resolve layouts, tolerances and service interfaces before manufacture. This reduces site rework, improves buildability and strengthens programme certainty, particularly on refurbishment projects and multi-trade environments. All manufacture is completed in-house using computer numerical control machining and structured quality control. The business has previously delivered work in Spain within the high-value property market, including the Costa Blanca and Costa Brava.

### Product/Service

Cambrian Furniture Company supplies fitted and freestanding furniture, together with interior joinery packages, on a supply-only basis, supported by coordinated drawings and schedules for local installation teams. Products include kitchens, bedroom and wardrobe systems, utility and mudroom cabinetry, media walls, architectural joinery, wall panelling, and freestanding furniture, suitable for residential, hospitality, workplace, healthcare and leisure projects. Cambrian Furniture Company is the trading name and umbrella brand through which SDB Interiors presents its offer to market, with all design, manufacture, quality control and documentation delivered through SDB's North Wales operation.

### Objectives

During the Madrid mission, Cambrian Furniture Company aims to establish a commercially viable route to market in Spain, with a structure that can be scaled across the wider European Union. The priority is to secure introductions to procurement-influencing decision-makers and delivery-capable partners, including contract fit-out contractors, specialist joinery contractors, distributors and established showroom groups with installation capability. The objective is to convert discussions into defined next steps, including sample requests, pilot packages and pricing for live opportunities, while validating procurement routes, lead time expectations, documentation requirements, delivery terms and aftercare arrangements.

**Dynamic X Plus** was established in 2012 and combines over a decade of luxury visualisation expertise with the latest digital narrative technologies.

Dynamic X is a Wales-based Architectural visualisation company working collaboratively with property developers, construction organisations, and sector partners across the UK and internationally.

Awarded as one of Wales' leading luxury visualisation teams in 2025, Dynamic X specialises in helping clients clearly communicate the vision, scale, and value of the developments and projects.

The company delivers high-quality visualisations tailored for a wide range of developments, including housing, apartments, commercial buildings, hotels, and mixed-use schemes.

---

### Product/Service

---

Designing and creating an extensive range of immersive visualisation solutions to include:

- High-quality CGI imagery
- Cinematic 3D flythroughs and walkthroughs
- Immersive visualisation web applications tailored for a wide range of developments, including housing, apartments, commercial buildings, hotels, and mixed-use schemes.
- Dynamic X also creates immersive VR experiences to support development marketing, sales launches, stakeholder engagement and project

communication from early concept through to delivery.

---

### Objectives

---

Dynamic X is working in a collaborative and consultative manner, offering flexible and reliable engagement models including pricing, quick delivery and extensive client communications.

Dynamic X aims to support clients present its projects with confidence and align stakeholders and potential buyers at every stage through quality, clarity and storytelling.

THE WELSH RENEWABLE  
& CLEAN ENERGY EXPORT  
CLUSTER SUPPORTS  
THE SECTOR IN WALES  
TO CONNECT WITH  
INTERNATIONAL MARKETS.

The Cluster embraces a number of areas, with wind energy being a major component, given the impressive array of wind farms around the Welsh coast.

Furthermore, the Crown Estate's 4.5 GW Round 5 seabed leasing programme presents a major opportunity to grow the sector in Wales.

---

Meet our Cluster at Wind Europe 2026.
