

KEY DATES

Measure	Records required by:		Notes:
	01/01/23	30/04/23	
Livestock manure limit for holding (170kg/ha) calculations	✓		
Number of livestock on holding for the previous storage period		✓	
Sites used for temporary field heaps		✓	
Number of animals on holding the previous calendar year		✓	
Number of animals on holding the previous calendar year - days occupancy		✓	
Number of animals on holding the previous calendar year - calculate nitrogen produced		✓	
Nitrogen plan - what you intend spreading (nitrogen - containing fertilising materials) on to permanent grassland	✓		annually but before spreading
Nitrogen plan - what you intend spreading (nitrogen - containing fertilising materials) on to all other land other than permanent grassland			before spreading
Nitrogen plans to include - name/ref of field, area to be planted and crop type			before spreading
Nitrogen plan - soil type, previous crop, Soil Nitrogen Supply (SNS), date crop to be planted, yield, optimum nitrogen required taking into account SNS			before spreading
Organic manure spreading - type, nitrogen content, available nitrogen, where (area), when (date)			before spreading
Records of - crops grown - date sown			within one week
Spreading of organic manure - what, where, when, how much, total and available nitrogen			within one week
Yield of crop			within one week
Record of how any grassland was managed in the previous year		✓	

Calculations that must be updated	within one month of changes	within one week of changes
Livestock manure produced in a yard or building during the storage period	✓	
Storage capacity required for livestock manure produced in storage period	✓	
Changes in storage capacity		✓
Change in land area of holding	✓	
Import or exportation of livestock manure onto or off the holding		✓

Other key dates (exemptions may apply - for full details see Welsh Government guidance)

Manufactured nitrogen fertiliser - no spreading periods (all dates inclusive)	
Grassland	15 September to 15 January
Tillage land	1 September to 15 January

Storage period (i.e. no spreading) high readily available nitrogen organic manures	Soil type	
	Sandy or shallow	All other types
Grassland	1 September to 31 December	15 October to 15 January
Tillage land	1 August to 31 December	1 October to 31 January
