

## Discover what Farming Connect support is available...

### E-learning

Short online modules to be completed in your own time. Topics include -  
*An Introduction to the principles of IPM, Food Safety for Growers of Fresh Produce, Horticulture Startup and Development, On Site Composting for your Horticultural Enterprise, Organic Horticulture, Principles of Plant Pests and Diseases.*

### Horticulture Training Programme

This provides a range of bespoke study visits, training workshops, online meetings and webinars which are designed for the Welsh horticulture industry.

### Advisory Service

Up to 90% funding towards bespoke confidential advice, your chosen adviser could support with core business advice or technical elements of your business. They will give you clear recommendations on the next steps you should be taking.

### Accredited Training Courses

A large range of short, accredited training courses funded up to 80%. The courses include a range of machinery and equipment, business and people management, marketing and social media, health and safety and environmental courses.

### Stakeholder Group

Attend one of two horticulture stakeholder groups to give grower representation to Welsh government and wider stakeholders. Access to network specific training and study visits.

### Initial discussion

*with Horticulture Development Officer or Technical Officer.*

Discuss horticulture on your site, including: Current and potential horticulture operations, Customers and markets, Skills and labour, Pests and diseases

### Networks

By joining a grower network you can benefit from experience and support of specialists and other growers, share best practice and discuss challenges.

### Business Support

Up to 12 hours of fully funded customised business support with our horticulture specialists to develop your horticulture enterprise and run it sustainably, efficiently and profitably.

## Darganfyddwch pa gymorth Cyswllt Ffermio sydd ar gael...
