Strategic Awareness Events

16

Events

262

Attendees

Example of events during this period were:

- Feeding the modern dairy cow with 2023 silage – how to get more for less
- Animal Health - Importance of Nutrition in Sheep

Surgeries

182 Surgeries have been completed

Topics included - Diversification, Planning, Business

Feedback: "This was an excellent service, they explained more about planning and how that relates to our farming operations in one hour than I've learned in my life thus far. We now have a much more clear plan moving forward."

Mentoring

196.6 hours of mentoring have taken place

- Benchmarking and business planning
- Converting to organic/regenerative farming
- Diversification (including into horticulture) & adding value
- Joint ventures, succession planning & new entrants
- Horticulture start-up and development

Extracts from mentoring diaries include:

1. Focused on equality and diversity with farm visits, how to promote women in agriculture and getting disabled people on farm and also monitoring social impact of the diversification project of farm based educational programmes.
2. We tried to gain more clarity on profit margins. Consider making a physical list of pros and cons of his suckler herd. Mentee to collect data on calvings, age at sale, feed costs etc.
3. Discussed different VAT programmes such as Xero, QuickBooks as well as spreadsheets.

Agrisgôp

21 Agrisgôp meetings have taken place

- Benchmarking & business planning
- Lowering external inputs to maximise profits and benefit the environment
- Converting to organic/regenerative farming
- Diversification (including into horticulture) & adding value
- Joint ventures, succession planning & new entrants
- Horticulture start-up and development
- Biosecurity (livestock and arable)

Groups that met during this period focussed on -

A group of dairy farmers with milk vending machines are sharing experiences/challenges and working together to develop their enterprises to make them more sustainable after experiencing a drop in sales.

Addressing cattle mobility through the sharing of knowledge, ideas and, most importantly, practical changes that can be implemented on-farm to address lameness challenges.

Exploring the possibility of planting Elderberry trees and possibly other berry crops as agroforestry systems on their farms.

Accredited Training

	Courses on Offer	Individuals Supported	Hours of Training	Grant Funding
Total	22	10	81	£2,360

10 businesses were supported.

E-Learning: Energy Efficiency on Cereal Farms
E-learning: Sustainable Farming - Overview of Resilience and Production
E-learning: Introduction to Sustainable Farming

Welsh Sheep Genetics Programme

Knowledge Transfer Activity

'Introduction to Performance Recording' workshops - 40 individuals attended to learn how improved sheep genetics leads to more efficient and productive flock.

'The importance of ewe nutrition, pre and post-lambing' webinar - 27 individuals attended a webinar with sheep specialist Kate Phillips, focusing on meeting the dietary requirements of ewes in the build up to lambing, and afterwards.

Feedback from attendees:

"A very informative webinar, which I found very useful at the exact right time."

WSGP Study Tour to Scotland - 34 individuals participating in the Welsh Sheep Genetics Programme attended a two-day Study Tour to Scotland. The objective was to exchange knowledge by visiting three sheep farmers who were pushing boundaries by harnessing innovation and adopting alternative farming practices within their livestock systems.

Feedback from attendees:

"Great trip organised by the Farming Connect WSGP with some very impressive farming systems visited. Learned a lot about the importance of data collection in order to improve and enhance genetic traits within the flock. Few ideas to come away with and a great group of people to network with to share ideas."
