

Using our global network we can help you connect with your ideal partner or customers in over 50 countries. We have access to experts on the ground who speak the language, understand the business customs and etiquette and how best to approach potential customers.

How can you benefit?

If you have qualified your target market and are ready to look for your opportunities then ITO can provide support by:

- Providing business information at a local level
- Advising on local trading conditions and regulations
- Identifying potential customers, agents or distributors

- Contacting potential customers, agents or distributors
- Arranging face-to-face meetings with interested parties
- Supporting you during your time in market

ITO can be used as the next step following an International Trade Development project, to assist you prior to and during a trade mission or Overseas Business Development Visit or independently.

ITO is available to both new and experienced exporters regardless of size. The Welsh Government will support 75% of the total project cost and companies are asked to contribute 25% of the project costs subject to eligibility.

“Support from the Welsh Government got us thinking about the endless possibilities of exporting our products and gave us support for this to happen. We now have a thriving export business with a lot of thanks to the Welsh Government.”

Chris Thompson, Business Development Director, Wholebake Limited.
