### Making new friends

And keeping the old (Charter). Hello, Marat Sans and Noe.

**W**e'd like to introduce you to a couple of new friends of ours here at Medium. You may have seen them lounging about.

Noe is our new Medium brand typeface. Noe made its first appearance in August, when we launched our new brand identity. Noe Display Bold is the face we used as the basis for the Medium wordmark. We're using Noe Display Medium as the voice of Medium on marketing pages and in places where we encourage users to sign in and upgrade. When set in Noe, these messages are eye-catching and clearly set apart from the content of stories so that readers aren't confused where an author's writing ends and the platform begins.
