wavehill™

social and economic research

‘The success of the project in that respect seems to be largely based on the ability to utilise and build on structures and relationships that were already in place in the local areas as a result of Môn Larder and other Menter Môn projects’

‘There was no need to develop new relationships, set up new partnerships and so on – they already existed’

wavehill™

social and economic research

‘The partnership in place to delivery the Neges project included the public, private and third sector with each contributing its knowledge and skills to the project, which was managed with little hierarchy, making decision making quick and effective’
