On-Farm Efficiency & Diversification

Small Grants – Efficiency Scheme

The Small Grants - Efficiency scheme is designed to help farmers in Wales to improve the technical, financial, and environmental performance of their farm businesses.

It aims to increase on-farm investment, to increase technical performance, increase on-farm production efficiencies, increase on-farm resource efficiencies, and enhance the use of technology to improve management decisions.

The scheme will support capital investments in new equipment and technology that have been pre-identified as offering clear and quantifiable benefits to your farm business.

Grants of between £1,000 and £12,000 are available.

Farmers are encouraged to consider what investments are suitable for their businesses so any changes or new practices introduced can make a positive impact on business performance.

The application window is running between 18 May and 29 June 2022.
