# Upgrade, coffee shop, restaurant and function room, North Dock Discovery Centre

## What are the projects aims?

To establish a new dining establishment to include a coffee shop, restaurant, and function suite to serve the Millennium Coastal Walk area and to enhance the facilities available to locals and tourists.

## How were these aims achieved?

The offering of more than one dining experience has enabled us to cater for everyone from a coffee and cake to a special celebratory dinner. Making it a destination to come to and enjoy and spend more time in the area. A place for everyone to enjoy

## Who was involved?

We engaged with local builders and tradespersons including Thomas Parry Design, Edmunds

Webster, Bar and Catering Supplies.

## What has been the greatest achievement so far?

Seeing so many local and now regular customers enjoying their dining experience.

## And the biggest challenge?

The restrictions in trade over the last 2 years through COVID

## Any tips for those setting up a similar project?

You need to be fully committed as this is not a 9 to 5 job.

## What's next for your project?

Continue to recover from the restrictions due to COVID and provide a welcoming and safe place for our customers.
